When you compare the Credit Union systems available today, the advantages of GENESIS become quickly apparent.

GENESIS provides the smaller credit union with a State-of-the-Art credit union software using a standard WINDOWS® environment. Your credit union computer system investment is protected because GENESIS software can be installed on most brands and sizes of computer equipment and is compatible with standard operating systems including Novell® and WindowsNT®. GENESIS can be upgraded to the more robust VISION XXI system

Standard GENESIS supports Regular Shares, Club Accounts, IRA Accounts, Certificates, Money Market Accounts, and escrow. Shares incorporates flexible Dividend Calculation & Payment Processing, full compliance with Truth in Savings, and supports unlimited share type accounts under one account number.

GENESIS Loans supports Open & Closed End Lending, Automatic Late Fee Calculations, Delinquency & Collection Tracking, and supports unlimited loans and loan types under one Account Number.

The Payroll Deduction feature provides Positive & Exception Payroll with the ability to make deductions to any member share or loan account.

VISION GENESIS gives you the ability to easily and quickly customize your system, and to meet the challenges of the future with our VISION XXI software offering. To provide your members with a more comprehensive offering just give FSSI a call.
