## CHALLENGE AND OPPORTUNITY

Today's Credit Union Industry faces ever-increasing challenges and opportunities. Consider the consequences of federal and state regulations, banking and S & L competition, and most important, a membership demanding a comprehensive single source financial service. How do you meet the challenges, grasp the opportunities, and remain cost effective?

## A COMPREHENSIVE AUTOMATED SYSTEM

VISION XXI is a comprehensive automated system specifically designed for Credit Unions using Credit Union recommendations. By harnessing today's state-of-the-art computer technology and Credit Union input, VISION XXI delivers powerful yet affordable member services, which are easy to learn and use. VISION XXI can reduce your up-front software costs 50% while meeting or exceeding competitive systems specifications. Whether you are currently a manual operation, use a service bureau, or utilize an in-house system based on older technology, VISION XXI, using Windows® based systems for servers and workstations, should be a serious consideration for meeting your and your member needs.

## COMPLETE MEMBER SERVICE

VISION XXI is a complete member service package highly adaptable to your method of doing business. More important, VISION XXI can adapt to changes in how you do business. Take a look at VISION XXI features and options on this insert.

## STAY COMPETITIVE THROUGH COST CONTROL

Operating costs remain a major consideration in today's competitive Credit Union Industry. VISION XXI systems not only utilize today's technology for increased productivity but also generate cost reductions of doing business.

Each VISION XXI installation is designed and configured to meet today's workload and anticipate potential future expansions. VISION XXI operates in a universal environment; specific and special software needs are customizable and adaptable to new and powerful hardware innovations as they are developed. In other words, your investment in software and training is protected for the future.
